ABSTRACT

This statewide survey (parelleling a 1983 study) was conducted by the Oregon Department of Education in 1985 to assess the status of microcomputer usage and instructional microcomputing in the public schools of the state. A total of 1,181 principals responded to the mailed questionnaire for a response rate of 96% as opposed to 90% in 1983. The information sought was similar to the 1983 survey in requesting data on: the number and types of computers used for instruction; how the microcomputers were being used for each of the most prevailing instructional functions; the number of computer literate teachers; and whether the individual school districts had computer literacy goals. Additional questions addressed: the location of computers in the schools; whether the school had designated a computer coordinator; the types of students receiving instruction in computer literacy; and the percentage of teachers using computers for instruction. Comparisons of the results of the two surveys show: (1) an increase of 132% in the number of computers used for instruction; (2) a significant increase in the number of computers per school; and (3) a shift in the provision of computer literacy instruction from all students in 1983 to, in 1985, those students in grades 7-12 who were taking mathematics or science courses. A comparison of these survey results with the results of the latest national survey of instructional uses of school computers (edited by Henry Becker) concludes the brief narrative report. Tables displaying the data for the current survey are presented in two appendices which make up the major part of this report. (RP)

It is the policy of the State Board of Education and a priority of the Oregon Department of Education that there will be no discrimination or harassment on the grounds of race, color, sex, marital status, religion, national origin, age or handicap in any educational programs, activities, or employment. Persons having questions about equal opportunity and nondiscrimination should contact the State Superintendent of Public Instruction at the Oregon Department of Education.

Preface

The Oregon Department of Education has been pleased to work with the University of Oregon in preparing this analysis of the status of microcomputing in Oregon. As computers have become important in the classrooms of Oregon, we need to follow the changes and know the capabilities and potential for our students. This document examines what types of equipment are available, how many, how they are used in instruction, which students have access to them, and what kind of coordination there is for the schools' computer programs.

Oregon has been an educational leader in many ways, including instructional computing. More than a decade ago the Oregon Council for Computers in Education (OCCE) was so active that educators in Washington and Idaho expanded the membership and the OCCE became NCCE, the Northwest Council for Computer Education. At the same time that the name was changed, another portion of the OCCE became the ICCE, International Council for Computers in Education. The ICCE copyright policy is the one most widely adopted by schools worldwide. The tradition of Oregon teachers being innovative is a strong one.

of Public Instruction

The Status of Microcomputers in Oregon Public Schools

INTRODUCTION

In the fall of 1983 the Oregon Department of Education conducted a survey to assess the status of microcomputer usage and instructional microcomputing in the public schools of the state. During the fall of 1985 a second statewide survey was conducted and while paralleling the first one, a few more questions were added to the questionnaire to obtain additional information related to:

1. The location of the school;
2. The designation of a computer coordinator in the school; and
3. The percentage of teachers who used computers for instruction.

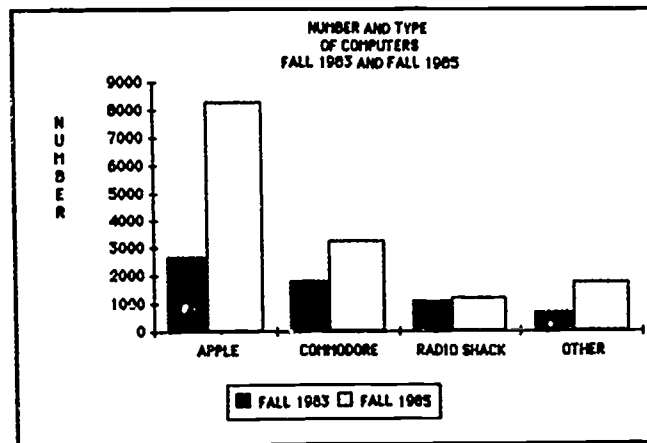

Both of these surveys were accomplished by means of mailed questionnaires to the principal and based on a probability sample of 1,116 and 1,181 public schools, representing respectively a statewide response rate of 90 percent in 1983 and 96 percent in 1985. The information provided was forwarded to the Department of Education by the principal, the primary-using teacher or the microcomputer coordinator in the school. Without their interest this survey would not have been possible, and the appreciation for their effort by the Department of Education cannot be overstated.

THE SURVEY

In 1983, approximately 431,300 children/students were enrolled in 1,233 public schools grades K-12, compared to 1985 in which 1,228 schools had a population of 431,184 pupils. Of all of these schools only 80 (6.7 percent) in 1983 and 43 in 1985 (4 percent) reported that they had NO computers for instructional purposes. On October 1, 1983, the number of microcomputers in the Oregon public schools totaled 6,259, in sharp contrast to October 1, 1985, where 14,554 computers were reported in use for instructional purposes, an increase of 132 percent. In other words, the average number of micros per school in the State of Oregon has grown from approximately 5 microcomputers in 1983 (e.g., one computer for +/- 68 students) to approximately 12 computers (e.g., one computer for +/- 29 students) per school in 1985, a significant increase for a period of two years. Figure 1 on the following page presents the type and number of microcomputers used for instruction at schools irrespective of type (i.e., high school, junior high, elementary, etc.).

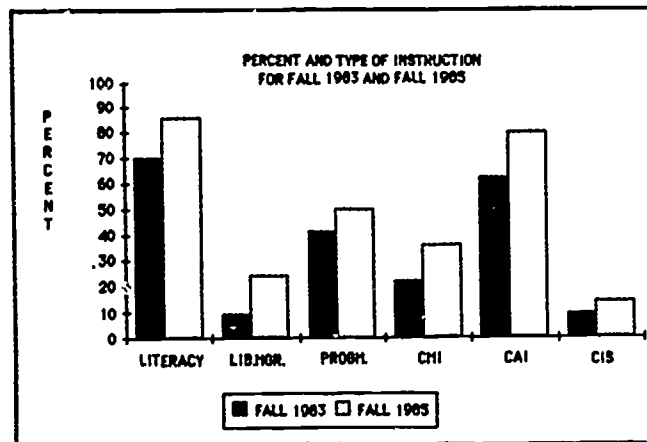

*Data collected by Oregon Department of Education, James Sanner,
Instructional Technology Specialist.

Figure 1

In addition to the type and number of computers used for instruction, survey respondents were asked to report how their school's microcomputers were being used for each of the most prevailing instructional functions. Figure 2 below displays these responses to six categories.

Figure 2

Apart from using microcomputers for Library Management (LIB) and Career Information Systems (CIS), general computer literacy is the most prevailing activity, while Computer Assisted Instruction (CAI) leads computer programming (PROGM) as the most common application of microcomputer technology. Because many schools identify their instructional modalities in reference to

the type of students they serve (e.g., learning disabled, gifted, etc.), this survey attempted to find out who among the students' population received computer literacy instruction. Figures 3-6 present, by grade level, the percent of schools which reported giving such instruction to all their students, to their talented and gifted (TAG) only, or to their students while receiving mathematics and science instruction. Of interest here is the fact that in 1983, computer literacy was provided to ALL STUDENTS, irrespective of grade level, while in 1985 this majority shifted in the 7-12 grades to those students who were taking mathematics or science.

Figure 3

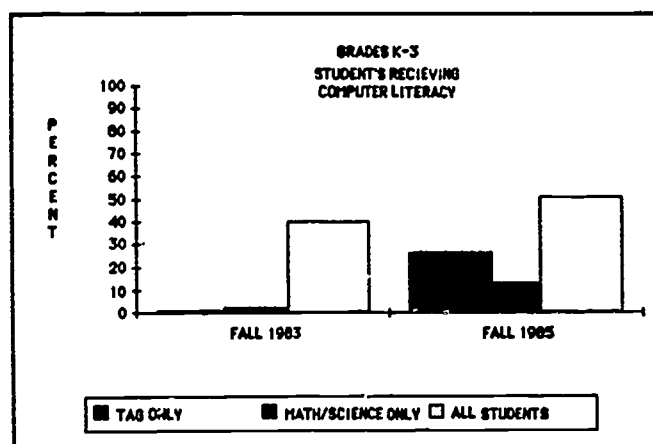

Figure 4

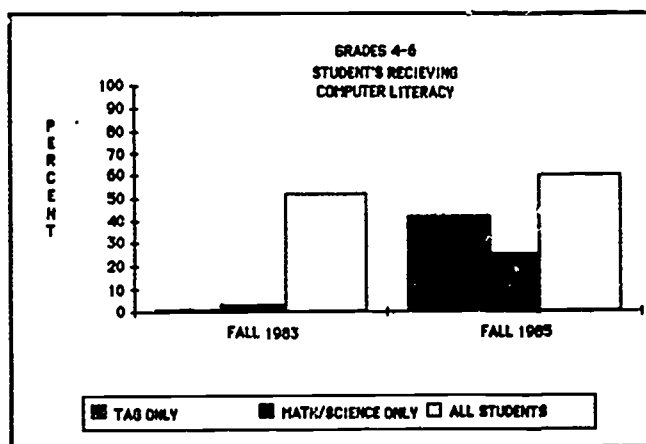

Figure 5

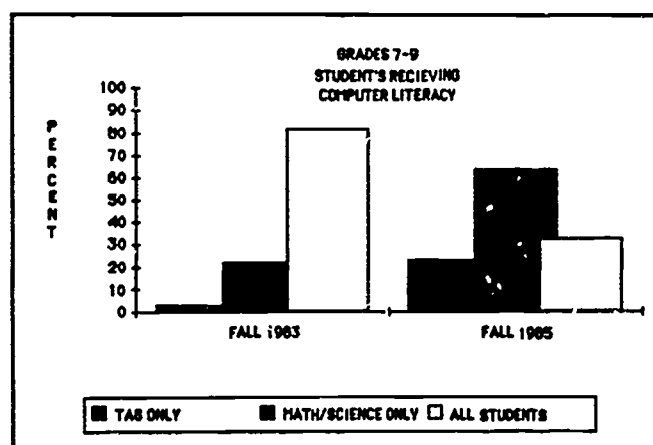

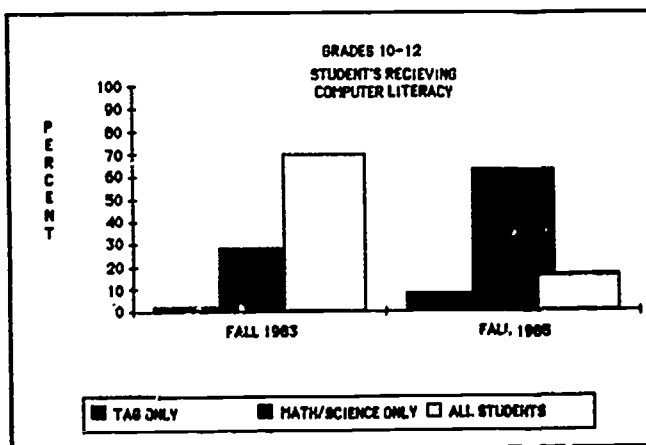

Figure 6

From 1983 to 1985 there was a significant increase in the percentage of teachers who were computer literate: 30 percent in 1983 versus 59 percent in 1985. Although these figures represent a 29 percent increase over a period of two years, only 43 percent of the teachers who taught at schools with microcomputers reported that they used microcomputers in instruction.

Because many educators believe that the location of microcomputers in a school determines to a large extent their use, this survey tried to ascertain the most common locations. Nationally, a survey conducted by Dr. Henry Jay Becker of the Center for Social Organization of Schools, the John Hopkins University, found that given the relatively small number of computers for a large student body in most instances, schools have made a variety of decisions about their physical location. For example, some schools locate their computers in libraries or in computer laboratories. In light of these findings, the questionnaire for this survey of Oregon schools requested the respondents to verify the location of microcomputers in their school through four options: the computer laboratory, the classroom, the resource center or the audiovisual check-out. Table 1 below presents their responses.

TABLE 1

Location of Microcomputers in School Buildings

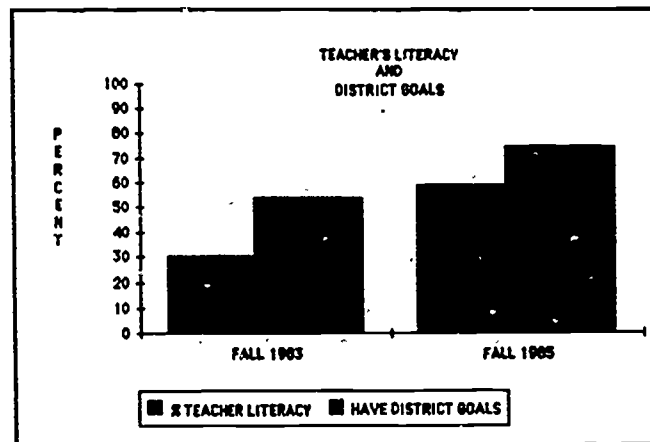

Computer Laboratory	52%
Classroom	80%
Resource Center	48%
Audiovisual Room Check-Out	19%

In the 1983 survey, no mention was made with regard to the availability or existence of a computer coordinator. This question was raised in the 1985 survey, and provided the following findings:

1. Eighteen percent of the Oregon public schools have a full-time coordinator;
2. Forty-four percent of the Oregon public schools have a part-time coordinator; and
3. Thirty-three percent have no coordinator at all.

Finally, with regard to whether or not districts in Oregon have computer literacy goals, the following statement can be made. In 1983, 54 percent of the districts responding to the questionnaire reported that their district had identified computer literacy goals, in contrast to the findings of the 1985 survey which revealed that 75 percent of the districts now had these literacy goals in force (see next page, Figure 7).

Figure 7

CONCLUSION

Although the survey results presented here were based on the analysis of data provided by the principal, the primary-using microcomputer teacher or the computer coordinator of participating Oregon schools, its findings are consistent with those found in Dr. Henry Becker's latest national survey of instructional uses of school computers. Nationally, it is estimated that a majority of U.S. elementary schools have 5 or more computers, while secondary schools have 15 or more. Whereas two-thirds of the computer-using schools have at least three teachers using computers in their schools and one-third have at least six, schools in Oregon average 43 percent of their teachers using computers in instruction. Although regional and locational differences among schools exist, Oregon does not differ significantly from the way the schools nationwide use microcomputers. In summary, the majority of schools in Oregon, as it is the case in the United States at large, still see computer literacy, CAI and programming as the primary useful functions of computers, although the over-time trends indicate that applications will be the main uses of the future. Finally, in contrast to national findings, there are clear differences between the type of students receiving computer literacy at the elementary grade levels and those students using computers in secondary schools. In the K-6 grades, the dominant trend seems to reflect a philosophy that ALL students should be exposed to computer utilization, whereas in the 7-12 grades mainly mathematics and science students seem to be its beneficiaries.

Following are the data sheets from which this data analysis was constructed. The columns on the data sheets identify the issue at hand, with wherever appropriate indicating a "1" for a positive response and a "0" for a negative one.

THE SURVEY DATA LISTED BELOW IS THE FIRST PART OF THE REPORT WHICH PROVIDES INSIGHT ON THE STATUS OF MICROCOMPUTERS IN THE STATE OF OREGON. OF A STATEWIDE SAMPLE OF 1228 OREGON SCHOOLS, 1181 RESPONSES WERE OBTAINED, WHICH REPRESENTS 96% PARTICIPATION BY OREGON PUBLIC SCHOOLS. THE INFORMATION ABOUT COMPUTERS IN THESE SCHOOLS WAS PROVIDED BY EITHER THE PRINCIPAL, THE "PRIMARY COMPUTER-USING TEACHER" OR BY THE COMPUTER COORDINATOR FOR THE SCHOOL.

THE SURVEY DATA LISTED BELOW IS THE FIRST PART OF THE REPORT WHICH PROVIDES INSIGHT ON THE STATUS OF MICROCOMPUTERS IN THE STATE OF OREGON. OF A STATEWIDE SAMPLE OF 1228 OREGON SCHOOLS, 1181 RESPONSES WERE OBTAINED, WHICH REPRESENTS 96% PARTICIPATION BY OREGON PUBLIC SCHOOLS. THE INFORMATION ABOUT COMPUTERS IN THESE SCHOOLS WAS PROVIDED BY EITHER THE PRINCIPAL, THE "PRIMARY COMPUTER-USING TEACHER" OR BY THE COMPUTER COORDINATOR FOR THE SCHOOL.

THE SURVEY DATA LISTED BELOW IS THE FIRST PART OF THE REPORT WHICH PROVIDES INSIGHT ON THE STATUS OF MICROCOMPUTERS IN THE STATE OF OREGON. OF A STATEWIDE SAMPLE OF 1228 OREGON SCHOOLS, 1181 RESPONSES WERE OBTAINED, WHICH REPRESENTS 96% PARTICIPATION BY OREGON PUBLIC SCHOOLS. THE INFORMATION ABOUT COMPUTERS IN THESE SCHOOLS WAS PROVIDED BY EITHER THE PRINCIPAL, THE "PRIMARY COMPUTER-USING TEACHER" OR BY THE COMPUTER COORDINATOR FOR THE SCHOOL.

THE SURVEY DATA LISTED BELOW IS THE FIRST PART OF THE REPORT WHICH PROVIDES INSIGHT ON THE STATUS OF MICROCOMPUTERS IN THE STATE OF OREGON. OF A STATEWIDE SAMPLE OF 1228 OREGON SCHOOLS, 1181 RESPONSES WERE OBTAINED, WHICH REPRESENTS 96% PARTICIPATION BY OREGON PUBLIC SCHOOLS. THE INFORMATION ABOUT COMPUTERS IN THESE SCHOOLS WAS PROVIDED BY EITHER THE PRINCIPAL, THE "PRIMARY COMPUTER-USING TEACHER" OR BY THE COMPUTER COORDINATOR FOR THE SCHOOL.

THE SURVEY DATA LISTED BELOW IS THE FIRST PART OF THE REPORT WHICH PROVIDES INSIGHT ON THE STATUS OF MICROCOMPUTERS IN THE STATE OF OREGON. OF A STATEWIDE SAMPLE OF 1228 OREGON SCHOOLS, 1181 RESPONSES WERE OBTAINED, WHICH REPRESENTS 96% PARTICIPATION BY OREGON PUBLIC SCHOOLS. THE INFORMATION ABOUT COMPUTERS IN THESE SCHOOLS WAS PROVIDED BY EITHER THE PRINCIPAL, THE "PRIMARY COMPUTER-USING TEACHER" OR BY THE COMPUTER COORDINATOR FOR THE SCHOOL.

THE SURVEY DATA LISTED BELOW IS THE FIRST PART OF THE REPORT WHICH PROVIDES INSIGHT ON THE STATUS OF MICROCOMPUTERS IN THE STATE OF OREGON. OF A STATEWIDE SAMPLE OF 1228 OREGON SCHOOLS, 1181 RESPONSES WERE OBTAINED, WHICH REPRESENTS 96% PARTICIPATION BY OREGON PUBLIC SCHOOLS. THE INFORMATION ABOUT COMPUTERS IN THESE SCHOOLS WAS PROVIDED BY EITHER THE PRINCIPAL, THE "PRIMARY COMPUTER-USING TEACHER" OR BY THE COMPUTER COORDINATOR FOR THE SCHOOL.

THE SURVEY DATA LISTED BELOW IS THE FIRST PART OF THE REPORT WHICH PROVIDES INSIGHT ON THE STATUS OF MICROCOMPUTERS IN THE STATE OF OREGON. OF A STATEWIDE SAMPLE OF 1228 OREGON SCHOOLS, 1181 RESPONSES WERE OBTAINED, WHICH REPRESENTS 96% PARTICIPATION BY OREGON PUBLIC SCHOOLS. THE INFORMATION ABOUT COMPUTERS IN THESE SCHOOLS WAS PROVIDED BY EITHER THE PRINCIPAL, THE "PRIMARY COMPUTER-USING TEACHER" OR BY THE COMPUTER COORDINATOR FOR THE SCHOOL.
